<https://www.linkedin.com/in/therealakshay>

Full Stack Developer with 2.8+ years of experience building scalable applications using Node.js, Express.js, React, TypeScript, and PostgreSQL. Proven track record of improving system performance by 40-70% through query optimization and caching strategies. Experienced in IoT backend systems, REST/GraphQL APIs, and microservices architecture.

Work Experience

Software Developer | Eazy ERP Technologies Pvt Ltd, Bangalore

July 2024 - Present

- Developed client-specific report APIs delivering actionable business intelligence to 10+ clients.
- Built reusable UI components and improved user experience.
- Debugged applications for potential error identification and resolution.
- Enforced clean code practices, maintaining 90%+ code quality score.
- Collaborated with cross-functional teams to deliver project objectives.

Backend Developer | MWS Research Centre, Erode

June 2023 - June 2024

- Designed and implemented database schemas, optimizing query performance by 35%.
- Built robust REST APIs for CRUD operations.
- Generated comprehensive API documentation using Swagger UI.
- Developed comprehensive test cases ensuring 95%+ functionality coverage.
- Integrated 5+ external APIs, enabling real-time data exchange across services.

Software Developer | LevelX, Calicut

November 2022 - June 2023

- Developed 10+ reusable UI components, improving page load speed by 25%.
- Integrated 3+ external APIs ensuring seamless real-time data synchronization.
- Maintained clean and modular codebase, reducing code duplication by 30%.

Skills

Backend - **NodeJs, TypeScript, ExpressJS**, GraphQL, Loopback 4, NestJS, REST APIs, Microservices

Databases - **PostgreSQL, MySQL**, MongoDB, Firebase

Frontend - **React, JavaScript, Tailwind CSS, SCSS, Angular, NextJS**, CSS, HTML

Tools - Sequelize, Prisma, Docker, S3, Twilio, Amazon EC2, Redis, RabbitMQ

Projects

Recibo SFA

Recibo is a powerful Sales Force Automation tool designed for primary and secondary sales.

- Optimized database queries, improving report generation performance by 40% across 50+ report types.
- Implemented 10+ new APIs enabling seamless third-party integrations with 5+ services.
- Created 20+ custom reports based on client requirements, driving data-driven decision making.
- Conducted 100+ code reviews and led architectural discussions improving code quality by 20%.
- Debugged and resolved backend issues for smooth system operation.

Technologies used - ExpressJS, **MySQL**, **GraphQL**, Redis, **WorkerThreads**

DCON-AG - Drip Controller

DCON AG is an advanced application designed for agricultural use, allowing users to remotely control irrigation systems via the internet.

- Integrated Redis Cache, boosting server response time by 60%.
- Implemented RabbitMQ AMQP protocol, reducing packet loss by 95% during device-to-server transmission.
- Automated migration of Stored Procedures and Function during application boot.
- Configured Amazon S3 as centralized file storage, managing 10,000+ file uploads securely.
- Wrote 50+ API unit tests using PactumJS, achieving 90%+ test coverage.

Technologies used - Loopback 4, MQTT, **PostgreSQL**, Firebase, JWT, Docker

WMC - Wireless Motor Controller

Innovative **IoT** controller for irrigation and fertigation, designed to provide efficient and hassle-free farm control from anywhere.

- Migrated legacy PHP codebase to modern LoopBack 4 framework, improving maintainability by 50%.
- Integrated Redis Cache, boosting server performance by 70% and reducing API latency by 40%.
- Wrote 100+ unit tests using Mocha and Chai, ensuring 95%+ API reliability.

Technologies used - Loopback 4, MQTT, MySQL, Firebase, **RabbitMQ**

Education

Bachelor of Computer Application

University Of Kerala | 2021
