

AKSHAY KUMAR M

Full Stack Developer

akshay.anilseema@gmail.com | +91 7010704436 | github.com/therealakshaykumar | linkedin.com/therealakshay

SUMMARY

Full Stack Developer with 3+ years of experience building scalable applications using **Node.js, Express.js, React, TypeScript, and PostgreSQL**. Proven track record of improving system performance by 40-70% through query optimization and caching strategies. Experienced in IoT backend systems, REST/GraphQL APIs, and microservices architecture.

WORK EXPERIENCE

Software Developer | Eazy ERP Technologies Pvt Ltd, Bangalore

July 2024 - Present

- Developed client-specific reports and APIs, delivering actionable business intelligence to 10+ clients.
- Built an AI-assisted planogram dashboard with detailed data insights using Claude Code.
- Created a modular component system which improved scalability and developer experience.
- Enforced clean code practices, maintaining a 90%+ code quality score.
- Collaborated with cross-functional teams to deliver project objectives.

Backend Developer | MWS Research Centre, Erode

June 2023 - June 2024

- Designed and implemented database schemas, optimizing query performance by 35%.
- Built robust REST APIs for CRUD operations.
- Generated comprehensive API documentation using Swagger UI.
- Developed comprehensive test cases ensuring 95%+ functionality coverage.
- Integrated 5+ external APIs, enabling real-time data exchange across services.

Software Developer | LevelX, Calicut

November 2022 - June 2023

- Developed 10+ reusable UI components, improving page load speed by 25%.
- Integrated 3+ external APIs ensuring seamless real-time data synchronization.
- Maintained a clean, modular codebase, reducing code duplication by 30%.

SKILLS

Backend: Node.js, TypeScript, Express.js, REST APIs, GraphQL, Loopback 4, Microservices, NestJs

Databases: PostgreSQL, MySQL, MongoDB, Firebase

Frontend: React, JavaScript, Tailwind CSS, Next.js, Zustand, CSS, HTML

Testing: Jest, Mocha, Chai, PactumJS

Tools: Sequelize, Drizzle, Twilio, Amazon EC2, Redis, RabbitMQ, Docker, Gemini CLI

PROJECTS

Recibo SFA

Sales Force Automation tool designed for primary and secondary sales.

- Optimized database queries, improving report generation performance by 40% across 50+ report types.
- Integrated AI Planogram feature, improving shelf management efficiency.
- Developed 20+ customized Excel reports for clients, zipping and transferring files to Amazon S3.
- Utilized route-based code-splitting to reduce initial JS bundle size.
- Debugged and resolved backend issues for smooth system operation.

Technologies used: ExpressJS, MySQL, GraphQL, Redis, WorkerThreads, Claude Code

DCON-AG - Drip Controller

Application for agricultural use, allowing users to remotely control irrigation systems via the internet.

- Integrated Redis Cache, boosting server response time by 60%.
- Implemented RabbitMQ AMQP protocol, reducing packet loss by 95% during device-to-server transmission.
- Automated migration of stored procedures and functions during application boot.
- Configured Amazon S3 as centralized file storage, managing 10,000+ file uploads securely.
- Wrote 50+ API unit tests using PactumJS, achieving 90%+ test coverage.

Technologies used: Loopback 4, MQTT, PostgreSQL, Firebase, JWT, Docker

WMC - Wireless Motor Controller

IoT controller for irrigation and fertigation, designed to provide efficient, hassle-free farm control from anywhere.

- Migrated legacy PHP codebase to modern LoopBack 4 framework, improving maintainability by 50%.
- Integrated Redis Cache, boosting server performance by 70% and reducing API latency by 40%.
- Wrote 100+ unit tests using Mocha and Chai, ensuring 95%+ API reliability.

Technologies used: Loopback 4, MQTT, MySQL, Firebase, RabbitMQ

EDUCATION

Bachelor of Computer Application

University of Kerala | 2021
